

Surviving Sepsis -

Recognising, Assessing and Treating Sepsis to Improve Patient Safety

This inter professional course is suitable for acute-based nurses, therapists and hospital based doctors who are working in the ward setting.

An inter-professional course combining high fidelity simulation and workshops to explore human factor, early recognition and management of Sepsis, with focus on delivery of "The Sepsis Six and New Definition"

This course will offer the chance to practice in a safe environment, the real-life skills needed to assess and care for patients with sepsis.

6 CPD hours awarded
